

FACILITIES NEWS

A quarterly update on Facilities Projects

August, 2016

New Welding Shop Completed!

In a partnership with CTE and Instruction, Facilities has completed the new Welding Shop. The new shop features 8 individual welding stations complete with new welders. The space also includes a new metal fabrication area.

Additional features include a new office and upstairs storage area. The shop is ready to be used by students this Fall.

VOC-TECH REMODEL

Maintenance Specialists are busy finishing up the remodel of the former Voc-Tech building into the new ORL and Art space. The old Welding Shop has been transformed into large, open classrooms allowing the Art program room to more effectively conduct art and painting classes. On the other side, we have created a new storage and bike library space, helping ORL be more centralized.

ORL Climbing Wall

Part of the Voc-Tech remodel includes the addition of a Climbing Wall for the ORL program. After Facilities built the support structure, the Climbing Wall was installed by Entre-prises USA. Stop by and check it out!

Student Lounge

Over the summer break, Facilities spruced up the Student Lounge. We set up new furniture, painted the walls, and put down new carpet. Hopefully these updates will make the Student Lounge a more appealing space for incoming students.

DORM ROOM REMODELING

Six Dorm Apartments have been fully remodeled this year. The rooms look great and are ready for students to move in!

Water Tank

For anyone who spent the summer with no access to Facebook, cell phones, land lines, newspapers or people from Quincy, you may be wondering what happened to the Water Tank next to the LRC...

It caught on fire.

The fire was put out.

It was removed.

I know you, (just like the 911 operator), are asking: how could a WATER tank catch on fire? Answer: It was empty and a heat pump/exchanger was being installed inside. Luckily, there was no one inside the tank when the fire started. Quincy Fire Dept. was on the scene within minutes and the fire was quickly contained and extinguished. The replacement water tank is under construction and will be installed soon.

...cleaned up, trimmed, and added new mulch to the landscaping in front of the Hatchery Ponds. Definitely improves our curb appeal!

Grounds Updates

Our Groundskeepers were busy this summer! In addition to the regular maintenance of the fields and grounds, they added a 30 foot extension to the practice field and...
